

Notice of available Capital Retains refunds for members who had service with Salem Electric during the years 2000-2001.

What is Salem Electric?

Salem Electric is a not-for-profit electric utility, providing electricity to over 20,000 meters in parts of Salem and Keizer. Unlike investor-owned utilities, electric cooperatives provide electricity to their consumer-members at cost. Salem Electric delivers reliable and renewable electricity to members throughout a 17.5 square mile service territory.

What are Capital Retains?

Since electricity is delivered to members at cost with no excess expenses built in, at the end of each fiscal year, margins (operating revenue less operating expense) are allocated to members as capital retains (also known as capital credits) based on the member's purchases from the cooperative. Capital credits represent funds that have been invested in the electric utility plant. To date, Salem Electric has paid over \$30,000,000 in capital credits to its members.

When can members expect to receive a refund?

Each year the board decides whether the current financial condition of the cooperative allows for the distribution of capital credits. The board has adopted a policy of annually refunding 5% of the outstanding credits, which are currently being refunded in order of seniority after approximately 20 years. Members that move from Salem Electric's service area are still able to claim the credits they earned.

How do I make a claim?

This publication provides a list of Salem Electric members who had service during the years 2000-2001 and have unclaimed credits available. Contact Salem Electric at 503-362-3601 to request a claim form. The credits can be claimed by the individual or entities legally entitled or their heirs. Claims must be received by Salem Electric, PO Box 5588, Salem OR 97304, on or before December 10, 2020.

This list of names can also be viewed online at SalemElectric.com by selecting Capital Credits from the About SE dropdown list.

Notice of Available Refund of Salem Electric Capital Retains

PUBLIC NOTICE

NOTICE OF AVAILABLE REFUND OF SALEM ELECTRIC CAPITAL RETAINS

Included in today's paper for subscribers in zip codes 97301, 97303, and 97304 is an insert listing names of people who are entitled to a refund of Capital Retains from Salem Electric.

Salem Electric maintains records of Capital Retains ("Retains") withheld during the years 2000-2001 credited to the herein named persons, whose addresses are now unknown. Payments of the Retains are available to these persons or entities legally entitled thereto as listed.

The Salem Electric Board of Directors has declared that the Retains will be forfeited and returned to Salem Electric unless claims to payment are made in writing by the persons or entity legally entitled thereto.

Claims must be received by Salem Electric, P.O. Box 5588, Salem OR 97304, on or before December 10, 2020.

Call 503-362-3601 or email se@SalemElectric.com for more information.

Call 811 before you dig! It's free, it's easy, it's the law.

MORE THAN A BUSINESS. BUILDING COMMUNITY.

As an electric cooperative, Salem Electric is a community-focused organization that delivers affordable, reliable, and renewable energy to our members.

We are public power.

We are **MORE POWERFUL TOGETHER**

SALEM ELECTRIC
AN ELECTRIC COOPERATIVE

633 7th St. NW, Salem, OR 97304

HYDRO POWER FLOWS HERE

Hydropower is Affordable

This is because the “fuel” – water – is free, which keeps operating costs low and protects against fluctuations in fuel prices. Over the years, the dams have consistently provided some of the nation’s most affordable electricity.

Hydropower is Flexible

By adjusting the amount of water flowing through the dams, hydropower can be increased or decreased very quickly to meet changes in demand for power. This meets a fundamental requirement of all electric grids, which is that demand must exactly match supply at all times to keep the system stable.

Hydropower Backs Up Other Renewable Resources

Hydropower is a great back-up for wind and solar power—for example it can be ramped up to meet demand when the wind is not blowing, and dialed down at times of high winds.

Hydropower is Renewable

Each year, rain and snow replenish the supply. It is the nation’s most abundant source of renewable energy.

Hydropower is Reliable

Water from our rivers is largely a domestic resource that is not subject to disruptions from foreign suppliers, cost fluctuations in power markets, international political crises or transportation outages.

Hydropower is Clean

Hydropower produces no emissions. There are no gases or waste products that contribute to air pollution.

Hydropower is Efficient

Hydropower plants at dams convert about 90 percent of the energy in falling water into electrical energy. By comparison, fossil-fueled plants lose more than half of the energy content of their fuel as waste heat and gases.
